1. Date, version and main features of IMAPP MODIS releases

2. IMAPP Software

   IMAPP is funded by NASA to develop the International MODIS/AIRS Processing Package (IMAPP). The goals of the IMAPP project include:
   - To release a freely available package for processing MODIS and AIRS/AMSU/HSB data,
   - To promote and support the worldwide use of EOS data, and to involve the international community in EOS validation efforts.

3. MODIS Algorithms/Products Development

   NASA Direct Broadcast meeting - Hawaii

   Cooperative Institute for Meteorological Satellite Studies (CIMSS)

   University of Wisconsin-Madison

   1. Date, version and main features of IMAPP MODIS releases

   2. IMAPP Software

      NASA Direct Broadcast meeting - Hawaii

      Cooperative Institute for Meteorological Satellite Studies (CIMSS)

      University of Wisconsin-Madison

      1. Date, version and main features of IMAPP MODIS releases

      2. IMAPP Software

      3. MODIS Algorithms/Products Development

      4. AIRS Data/Algorithm Evaluation/Development

      5. MODIS/AIRS Synergistic Cloud Detection/Clearing

      6. Under Development / Experimental Products

      7. Summary and Future Work
