Recent advances in the use of satellite data in the French NWP models

Météo-France/CNRM-GAME/GMAP

If you want to talk about:

• GPS Radio-occultation
• Variational Bias Correction
• Met-9/SEVIRI in global and regional scale models
• Impact of IASI in ARPEGE
• Emissivity parameterization over land in order to assimilate more AMSU and SSM/I data
• Global and individual impacts of all assimilated data types in analyses

… meet me in front of my beautiful poster!
